Jira Story – Fill Billing Info

The screenshot displays a Jira Story page for the project 'Test Automation with...' and the issue 'SCRUM-10'. The story is titled 'Fill Billing Info' and is currently in the 'Done' state. The description includes testing techniques for form validation and a list of steps to complete the billing process. The activity section shows a comment from Jose Abarca detailing test results and a reference to bug SCRUM-58. The right sidebar provides details about the assignee, labels, parent issue, team, sprint, story point estimate, fix versions, development workflow, and reporter.

Projects / **Test Automation with...** / **SCRUM-10** / **SCRUM-37**

Description
Testing techniques: Form Validation Testing, BVA

Objective: Ensure users can enter and submit billing information.

Steps:

1. Proceed to checkout from the shopping cart.
2. Enter valid billing and shipping details.
3. Submit the form.

Expected Result: The order should proceed to the payment step without errors, and it should not accept appropriate data

JA Jose Abarca
yesterday

Test was performed with valid data, invalid data, and no data. Several errors were encountered. Including not throwing any errors, obligatory fields not being actually obligatory, and accepting invalid data.
Please refer to the bug Scrum-58 for more information.

Jira Story – Credit Card Test

The screenshot displays a Jira Story page for the story titled "Credit Card Test". The interface is divided into several sections:

- Left Sidebar:** Contains navigation links for "For you", "Recent", "Starred", "Apps", "Plans", "Projects", "Recent", "Test Automation with ...", "View all projects", "Filters", "Dashboards", "Teams", "Goals", and "Customize sidebar".
- Story Header:** Shows the breadcrumb "Projects / Test Automation with... / SCRUM-10 / SCRUM-39".
- Story Description:** A list of steps for testing a credit card transaction:
 2. Enter valid credit card details
 3. Click the Place Order button and verify if the transaction is successful.
 4. Enter an invalid credit card number and check for an appropriate error message.
 5. Enter an expired card and verify rejection.
 6. Enter an incorrect cvc and confirm that the payment is declined.
 7. Test with different card types
- Expected Results:** A list of expected outcomes:
 - Valid card: Transaction should be processed successfully.
 - Invalid card: The system should display an error.
 - Expired card: The system should display an error.
 - Wrong CVV: The system should display an error.
 - Missing Fields: The system should display an error.
- Confluence content:** A section titled "Product requirements" with a "TRY TEMPLATE" button.
- Activity:** A section with tabs for "All", "Comments", "History", and "Work log". It shows a comment from Jose Abarca (JA) from yesterday, detailing several errors found during testing:
 - Several errors found, including:
 - Test accept invalid data
 - Obligatory fields not being obligatory
 - Test accepting empty data.
 - Please refer to bugs Scrum-57 and Scrum-61 for more details.
- Details Panel:** A panel on the right showing metadata:
 - Assignee: Jose Abarca (JA)
 - Labels: checkout
 - Parent: SCRUM-10 Check Out
 - Team: None
 - Sprint: None (+2)
 - Story point estimate: 3
 - Fix versions: None
 - Development: Create branch, Create commit
 - Reporter: Jose Abarca (JA)
- Automation:** A section at the bottom right showing "Rule executions" with a "Configure" button. It indicates the story was created on March 20, 2025, at 3:21 AM, updated yesterday, and resolved yesterday.
